About Me

I am a frontend developer with over 2 years of experience. A major part of my work involves building e-commerce sites, automation tools, and cross-platform mobile apps. These projects have helped me build a strong foundation in JavaScript, React, and WordPress. I am also skilled in mobile-first design.

Experience

Frontend Developer

Berdl • November 2023 - Present

- Develop responsive and dynamic websites using HTML5, CSS3, JavaScipt and CMS platforms for optimal cross-device user experience.
- I build custom automation tools using APIs to improve team efficiency. These tools streamline complex workflows, boost overall productivity, and minimize time spent on repetitive manual tasks.
- Manage hosting and domain services to ensure deployment and maintenance.

Mobile Developer

AWIS LLC • March 2023 - June 2023

- Developed cross-platform mobile applications using React Native and TypeScript.
- Specialized in pixel-perfect UI design for a polished user experience.
- Utilized TypeScript to ensure robust and functional app behavior on both iOS and Android platforms.

Key Projects

BuyTicket Platform

React, Redux, JavaScript (ES6), Firebase database/authentication

Ticket purchasing website. Users can browse events, save favorites, and easily add tickets to their cart. The platform offers a personalized homepage and integrates Firebase for secure authentication. Admins can manage tickets and view user statistics, providing a seamless experience for both users and administrators.
You can find project here!

Mobile Application

React Native, TypeScript, Firebase, TypeScript

Taxi Service Application. Designed and developed a pixel-perfect mobile application for a taxi service, focusing on user interface quality and core feature implementation.

Google Chrome Extenstion

Chrome Extensions API, HTML5/CSS3, JavaScript (ES6),

Table Capture Extenstion. This custom Chrome extension extracts all HTML tables from the currently active tab and displays them in the extension popup. Users can view each table and download it as a CSV file. It uses plain JavaScript and the Chrome Extensions API for tab access, messaging, and DOM manipulation.
You can find project here!

Automatization Tool

JavaScript (ES6), HTML5 Canvas, html2canvas, JSZip, File APIs

Batch Watermark Tool. The Watermark Applier automates the graphic design process by allowing users to quickly apply watermarks to images. It offers customization options for watermark position, size, visibility, and quality. This tool streamlines repetitive tasks, making it easier and faster for designers to add watermarks and download the final image.

Technical Skills

Frontend

React, React Native, WordPress, Vite, Redux, JavaScipt (ESC6+), TypeScript, Material UI, HTML5 / CSS3

Database & Authentication

RESTful API

Database

Firebase

Version Control

Git, GitHub, Bitbucket

Education

Master of Computer Science

National Polytechnic University of Armenia
2025 - Present

Bachelor of Computer Science

National Polytechnic University of Armenia
2021 - 2025

React.js Course

Armenian Code Academy
Jun 2024 - Sep 2024

Advanced JavaScript Course

Armenian Code Academy
Jan 2024 - Apr 2024

Certificates

- Advanced JavaScript
- React.js

Languages

Armenian	Native
Russian	Advanced
English	Intermediate
